AVAILABLE NOW

# HyChat

Besides giving the business enhanced productivity with a seamless collaboration experience for chats, video Chat and video conferencing, with end to end encryption, **HyChat** provides -

-  Confidential and hidden chats (password protected)
-  Limit whether the recipient can copy, edit, forward or share
-  Create your own folders to store your message
-  Smart virtual folders that merge chats from multiple groups to one view - eg city sales hidden chats merged to form state sales
-  Easily transfer content from one employee to the next for business continuity
-  Option to host all data on your own cloud server
-  Tag and organize all your chat conversations
-  Create local encrypted backups
-  Powerful search functionalities

 Tag-enabled search to quickly locate what you are looking for; create your own tags

 Conversation thread-based search

While **HyChat** in itself equips you far beyond any routine chat platform's capability, you also have an option to upgrade to the full suite of **HyLyt** our all-in-one platform, that integrates and helps you to save and manage information from various other platforms into a **Unified Information platform** and additionally provides notes, tasks, file management and calendaring features as well.
